

Funmessages (1)

Inhaltsverzeichnis

- 1 Short description
- 2 Configurationoverview
- 3 Detailed configurationvariables

This is how you configure the `funmessages` plugin.

1 Short description

With this plugin, you can configure your own [funmessages](#).

2 Configurationoverview

JavaScript: configs/plugins/funmessages.json

```
{
    "aimbot":      "^5<PLAYER_NAME>      ^4turned      on
    "beer":        "^2Anicesexywaitressbrings^7<PLAYER_NAME>^2anicepintofbeer!",
    "bigadmin":    "    ^10oooooh,   ^3Big      Admin      is      watch
    "bye":         "^7<PLAYER_NAME>^2wavedhisandtosay^1GOODBYE^2.Wesurelymeetlater!",
    "cheat":       ":^7<PLAYER_NAME>^1thinksthat^7<PLAYER_LASTKILLER>^1scheating!",
    "god":         "    ^1GODMODE^2 is now enabled for player ^7<PLAYER_NAME>",
    LASTWEAPONKILLER<PLAYER_KILLS>"kills",
    "<PLAYER_LASTVICTIM>^7<PLAYER_LASTWEAPONKILL>",
    "pizza":       ":^2SomeonecallsMariando brings^7<PLAYER_NAME>^2nopepperonpizza!",
    <PLAYER_LASTKILLER>^7<PLAYER_LASTWEAPONDEATH>"
}
}
```

3 Detailed configuration variables

The configurationfile of the "[funmessages](#)" function is located in the configs/plugins directory and is named [funmessages.json](#). An explanation of the variables follows:

<u>Variable</u>	<u>Allowed Values</u>	<u>Description</u>
enabled	truefalse	You can (de)activate the plugin with this variable.
messages		This variable includes the object/has of the funmessage.

The following placeholder can be used in the command field.

Placeholder	Description
<PLAYER_NAME>	Will be replaced with the own name.
<PLAYER_TEAM>	Will be replaced with the own team.
<PLAYER_LASTKILLER>	Will be replaced with the last player who killed you.
<PLAYER_LASTVICTIM>	Will be replaced with the last player you killed.
<PLAYER_LASTWEAPONKILL>	Will be replaced with the last weapon you killed a player with.
<PLAYER_LASTWEAPONDEATH>	Will be replaced with the last weapon a player killed you with.
<PLAYER_KILLS>	Will be replaced with the own amount of kills.
<PLAYER_DEATHS>	Will be replaced with the own amount of deaths.
<PLAYER_TEAMKILLS>	Will be replaced with the own amount of teamkills.
<TIME>	Will be replaced with the current time. Format: H:i (Hour:Minute)
<PLAYER_COUNTRY_CODE>	Will be replaced with the own country code. (e.g. DE)
<PLAYER_COUNTRY_NAME>	Will be replaced with the own country name (e.g. Germany). The country name adapts oneself to the language which was set in the config.
<PLAYER_CONTINENT_CODE>	Will be replaced with the own continent code. (e.g. EU).
<PLAYER_CONTINENT_NAME>	Will be replaced with the own continent name. (e.g. Europe). The continent name adapts oneself to the language which was set in the config.
<PLAYER_CITY_NAME> *	Will be replaced with the own city name. (e.g. Berlin). The city name adapts oneself to the language which was set in the config.
	* Works only, if the extended geoip database is installed.

You are able to use color codes.
