How to make me an admin?

Inhaltsverzeichnis

- 1 look into the console directly after the first start
- 2 Look it up in the log file
- 3 Look it up from the tokens.json

How to make me an admin?

At the first start of the GSManager a random token will be created which can be used with `!token use <TOKEN>`.

To know this token you have three possilibities:

1 look into the console directly after the first start

If you have just started the GSManager for the first time, you can see the following info box:
Code

```
[01.10.15         00:51:47]         Info:         ******************************
[01.10.15     00:51:47]     Info:     *                      CREATED     ADMIN     TOKEN
[01.10.15      00:51:47]      Info:      *
[01.10.15    00:51:47]    Info:    *    You    can    use    it    ingame    over       *
[01.10.15     00:51:47]     Info:     *                        !token     use     Ydc-ouv-
[01.10.15 00:51:47] Info: ******************************
```

2 Look it up in the log file

Alternatively you can take a look into the log file (`logfiles/daemon.log`) and search for "ADMIN TOKEN".

3 Look it up from the tokens.json

As a second alternative you can look into the file, which holds every usable token: `config/storage/tokens.json`
It could look like the following:
Code

```
{

}
```

The first part is the token itself, the scond to which group you will be assgined.
